Define the space with depth and dimension.

Benefits

PowerView® Automation
The ultimate in home automation allowing you to control every shade with the touch of a button.

Fabric
Handcrafted from natural materials, from fine weaves to richly textured grass and wood, our fabrics are woven in innovative designs to create a versatile collection.

Independent Operable Liner
The freedom to turn the sheerest of any fabric into a room-darkening shade by combining the essence of natural woven shades with the energy efficiency of a honeycomb shade.

Four Product Styles
Roman, Recessed Roman, Waterfall Roman and Vertical Drapery styles provide both horizontal and vertical applications for every window and door in your home.

Fabric Calliope **Color** Santorini
Operating System PowerView® Automation **Deck** 25

The Hunter Douglas Provenance® Difference

The hallmark of every Hunter Douglas Provenance® shade is in the ingenuity that enhances both the performance and the look of the shade.

See The Difference	Understand The Benefits
Innovation	
Modern Headrail	Engineered features allow for Hunter Douglas proprietary operating systems.
PowerView® Automation	Effortless shade control with the touch of a button on mobile device or through automatic schedules. Voice control available when integrated with other smart-home systems.
PowerView® App	Operate shades from a smartphone or tablet device.
LiteRise®	Cordless system, simply push up to raise and pull down to lower.
UltraGlide®	Exclusive to Hunter Douglas, the revolutionary retractable system provides enhanced safety.
Liner Option:	
Attached Liner	Liner attaches to and moves with the shade. Available in light-filtering or room-darkening opacity.
Independent Operable Liner	Honeycomb liner operates independently from the shade providing optimal light control and privacy. Available in light-filtering or room-darkening opacity.
Construction	
100% Polyester five-ply yarn is used in all shades	Minimizes stretching, breaking and fading of all our fabrics.
Each fabric is woven with multiple yarns	Increases shade strength and durability.
Micro reeds are inserted into the grass fabrics at every 1" to 1½"	This weaving technique prevents sagging and minimizes twisting with grass shades.
The front and back face of bamboo slats are alternated	Reduces cupping or bowing allowing the shade to hang flat when lowered.
Bamboo is machine pressed to break down fibers	Reduces cupping or bowing in bamboo and wood shades.
Design Options	
Color-coordinated hardware and components	For a uniform appearance.
Cornice Valance	Fabric-wrapped sleek look attached on all sides and available in two depths depending on length of shade.
Modern Valance	Minimal fabric cover. Standard for Roman Shade or Recessed Roman.
Roman Valance	Relaxed profile where the face of the valance does not attach to the side returns.

Lifetime Guarantee | Proven systems and processes ensure years of dependable performance.

The unique woven fabrics offer varying levels of light control and privacy.

Liner Opacity Options

Light-Filtering Liner

Diffuses light for a soft glow while providing moderate privacy.

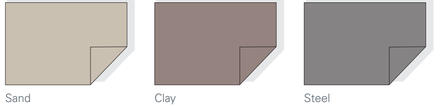

Room-Darkening Liner

Provides enhanced light control with maximum privacy.

Mono Liner Colors

This room-darkening liner features same color on both sides for color consistency on room facing and street side.

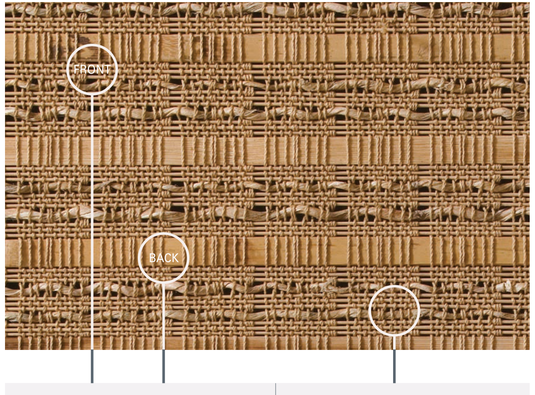

Actual color may vary from the printed samples shown. See Liner Accessory Deck for actual samples.

Nature's Beauty Marks

Not All Woven Woods are Created Equal

Provenance® Woven Wood Shades are created from natural wood, reeds, bamboo and grasses. Variations in stain, pattern and knots are all unique characteristics that add to the natural beauty of the shade. The difference at Hunter Douglas is in the engineering and manufacturing. Our fabric construction and weaving techniques minimize bowing and twisting and enhance the durability. The attention to detail is worth taking another look at so you can SEE THE DIFFERENCE & UNDERSTAND THE BENEFITS.

Wood & Bamboo

The bamboo is machine pressed to break down fibers then the front and back face of bamboo slats are alternated.

Reduced cupping or bowing allowing the shade to hang flat when lowered.

100% polyester five-ply yarn is used in all shades.

Minimizes stretching, breaking and fading of all fabrics.

Grass & Reeds

Each fabric is woven with multiple yarns.

Increases shade strength and durability.

Micro reeds are inserted into the grass fabrics every 1" to 1½".

This weaving technique prevents sagging and minimizes twisting with grass shades.

The grass weaving technique includes hand knotting.

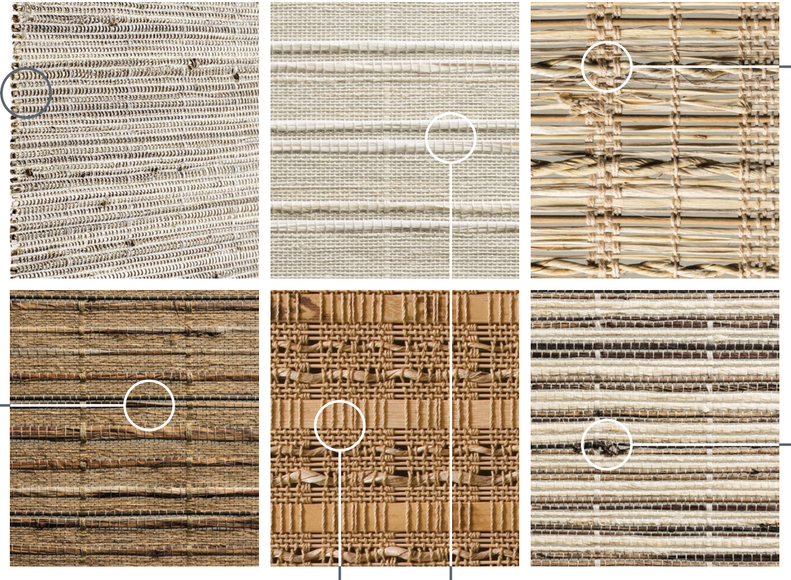

This extends the length of the fabric to 118" in some cases while adding texture and enhances the appearance of the grass.

Loose fibers are part of many grass fabrics.

Adding depth, interest, charm and character.

What to Expect

Today's fresh woven wood fabrics are created with lighter weight materials hand crafted to combine natural fibers into artful designs rich in texture and personality – letting the natural beauty of the materials show through. Our unique fabrics and patterns use a variety of natural materials harvested throughout the year and hand woven together. We carefully source our material to ensure consistency in appearance, yet each hand woven roll will have it's own special characteristics. So what could be perceived as imperfections in the fabric are indeed part of the fabric's natural and unique beauty.

Natural fibers are not perfectly finished on the edges and will feather and fall unevenly as they do in nature.

As in nature, the colors of fibers, reeds and grasses are uneven, yet harmonious.

Hand crafted materials are tied together during the weaving process and will create knots on the surface adding dimension and depth.

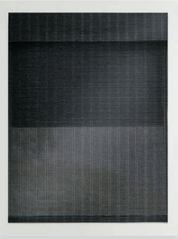

The natural shape and finish of reeds and sticks are unique and vary; each are artistically woven into the fabric for support and beauty.

Roman Shades and Vertical Drapery provide a Whole House Solution™ for every window and door in your home.

Fabric Soho **Color** Concrete
Operating System Vertical Drapery: Wand, Shade: LiteRise® **Deck** 6

Roman Shades are classic, timeless and provide a transitional style right for today. The soft folds create dimension and depth that highlights the characteristics of the woven, natural fabric.

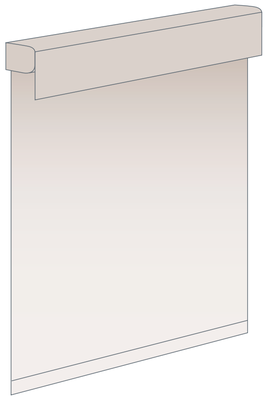

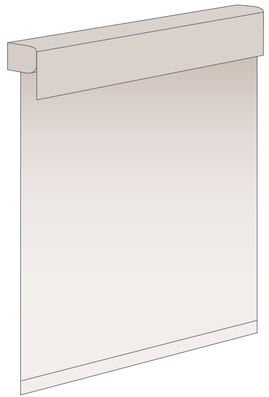

Fabric Mallorca with Independent Operable Liner **Color** Olive Tree
Operating System PowerView® Automation **Deck** Fine Weave 3

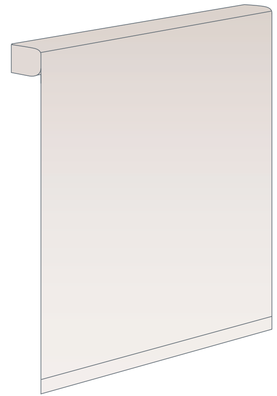

Shade Styles

Recessed Roman
Shade hangs flat in fully-lowered position and creates even, overlapping folds when raised. Comes standard with Modern Valance (2½" height).

Roman

Waterfall Roman
For a tailored look, the fabric cascades from the front of the headrail. No valance option available.

Gentle fabric folds bring added dimension to a room. The ideal solution for wide windows and doors. Vertical Drapery comes standard with a valance.

Expert Design and Craftsmanship

For over 100 years, Hunter Douglas has been the industry leader in innovation. We offer the widest array of beautiful, high-performance, custom-made window fashions that are intelligently designed and assembled with relentless attention to quality.

Designed with Safety in Mind

It is a Hunter Douglas priority to design products that are safer for infants, young children and pets. It's why Hunter Douglas has been the pioneer in developing innovative cordless systems and smart shade technology for your home.

Lifetime Guarantee

As an expression of our desire to provide you with a fully satisfying experience, all products are backed by a Lifetime Limited Warranty. For enduring quality and a sound investment in your home, insist on Hunter Douglas.

⚠WARNING

STRANGULATION HAZARD – Young children can be strangled by cords. Immediately remove this product if a cord longer than 22 cm or a loop exceeding 44 cm around becomes accessible.

⚠MISE EN GARDE

RISQUE D'ÉTRANGLEMENT– Les enfants en bas âge peuvent s'éntrangler avec des cordes. Enlevez immédiatement ce produit si une corde mesurant plus de 22 cm devient accessible ou si le contour d'une boucle de plus de 44 cm devient accessible.

⚠WARNING/ ADVERTENCIA

Window Blind Cord Strangulation Risk
Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products or products with inaccessible cords.

Riesgo de Estragulamiento en Cuerdas de Persianas Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.

Child Safety Labels on Corded Systems

These warning labels appear on window fashions with cords to make consumers aware of window cord hazards for children and pets.
